PROFESSIONAL SUMMARY

Computer Science student and AI & Machine Learning Trainee with a developing foundation in Artificial Intelligence, Machine Learning, and Python-based data analysis. Currently training through the Digital Egypt Pioneers Initiative (DEPI) in the AI & Data Science — Microsoft Machine Learning Engineer track, covering Python Programming, Data Science, Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Azure AI, and MLOps. Skilled in Python, NumPy, Pandas, Matplotlib, and Seaborn, with current learning in Neural Networks, NLP, AI, and Machine Learning. Seeking an AI/ML internship to apply technical knowledge, gain practical experience, and continue developing as an AI/ML Engineer.

TECHNICAL SKILLS

Programming: Python

Artificial Intelligence & Machine Learning: Artificial Intelligence, Machine Learning, Neural Networks

Data Science: NumPy, Pandas, Matplotlib, Seaborn

Specialized Areas: Natural Language Processing (NLP), Computer Vision

Tools & Platforms: Kaggle, GitHub, Microsoft Azure

EXPERIENCE

DEPI — AI & Machine Learning Trainee

July 2026 – Present

- Currently developing practical skills in Artificial Intelligence and Machine Learning through the AI & Data Science — Microsoft Machine Learning Engineer track.
- Studying Python Programming, Python for Data Science & AI, data preprocessing and visualization, and Machine Learning techniques.
- Developing knowledge of Deep Learning, Natural Language Processing with Attention Models, Computer Vision and Transfer Learning, Azure AI, MLOps, MLflow, and Hugging Face.
- Developing Python-based data analysis skills using NumPy and Pandas.
- Learning how data can be transformed into Machine Learning models and applied to real-world problems.

EDUCATION

El Shorouk Academy — Bachelor's Degree in Computer Science September 2023 – June 2027

CERTIFICATIONS

CS207: Fundamentals of Machine Learning — Saylor University Issued: May 11, 2026

Final Score: 96.00% | Certificate ID: 7456108775MZ

- Developed a strong foundation in machine learning concepts, algorithms, and workflows, including supervised and unsupervised learning.
- Learned how to prepare and analyze datasets, select appropriate models, and evaluate machine learning performance.
- Gained practical understanding of regression, classification, clustering, model evaluation, and feature engineering.
- Studied key concepts such as training and testing data, overfitting, underfitting, and model generalization.

Python — Kaggle

Issued: September 1, 2026

- Built practical programming skills in Python through hands-on exercises and data-focused applications.
- Learned core Python concepts including variables, data types, functions, conditional statements, loops, and data structures.
- Practiced writing clean and reusable Python code for data manipulation and problem-solving.
- Developed familiarity with Python tools and techniques commonly used in data science and machine learning workflows.
